

## PRESS RELEASE

### UPDATED ENERGY DELIVERY PLAN PUBLISHED

Connect Saint Helena Ltd has published a revised Energy Delivery Plan, showing the pathway to reach the target of 80% electricity generation from renewables by 2027/28.

The updates to the Energy Delivery Plan include summary findings from recent studies. These findings are being fed into the Modelling and Design Consultancy which will produce detailed designs. These designs will form the basis for future procurement. The Modelling and Design Consultancy is scheduled to be completed in January 2025.

The published version of the Energy Delivery Plan provides an overview of Connect's plans to achieve the 2027/28 target but details on cost and timetable have deliberately been removed from this document in order not to prejudice planned procurement exercises.

For further information, please see the Energy Delivery Plan at <http://www.connect.co.sh/electricity-generation1.html> or contact [enquiries@connect.co.sh](mailto:enquiries@connect.co.sh).
