

Now that the Solar Farm at the Rifle Range is up and running, you may be interested to know that electricity generation data for all of our solar sites is publicly accessible on-line.

The latest scheme to be added to the network is the CCC building at Half Tree Hollow and this will also be on-line very soon.

You can access the Sunny Portal website from either the link above or use the link from our own website, www.connect.co.sh.

Use the following instructions to find the Saint Helena pages.

Once you have accessed the Sunny Portal website:

1. Click on “**Publicly available PV systems**”
2. In the “**Country**” search drop-down menu, select “**Saint Helena**”
3. Click on “**Search**”
4. Click on the “**St Helena – Rifle Range**” PV System then use the menu on the left to see annual comparisons, monthly reports and much more.

SUNNY PORTAL | English

Easy, inexpensive and direct – Webconnect
The simple online monitoring for small PV systems

- ▶ Visualization of live data in Sunny Portal
- ▶ Direct data exchange with Sunny Portal
- ▶ Ideal solution for private PV plants with up to four inverters
- ▶ Fast and simple commissioning with the PV system setup assistants

	Yesterday	Total
PV SYSTEM:	204,718	
TOTAL ENERGY (TWh)	258.05	
AVOIDED CO ₂ (Mt)	180.63	

Current power: 6300 w
Energy: 33,86 kWh
Total: 5766.82 kWh

Current plant status: System Logout
Weather for Neustetal: 18° Sunshine
Tomorrow: Sunshine, 19°
